GD FIXED FILTERS AND PORTABLE FILTER

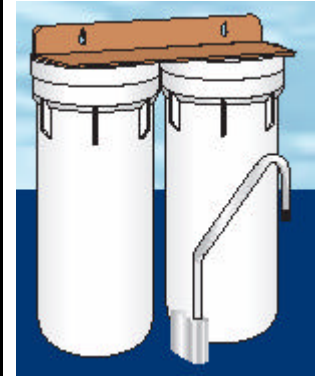

Fixed Filter

The filter connects directly into your Water Supply and is easily installed under the sink, bench top or on the wall.

All GD Fixed Filter Systems are supplied in complete self assembly 10" Kits and contain the following

- Filter Housing Highest quality, Food Grade Polypropylene with EPDM O-rings and a ¼" BSP thread.
- Bracket - Stainless Steel (rust free)
- Ball Valve assembly including Tube and Connectors
- Tap Long Reach Chrome and Black
- Suitable Spanner
- Suitable Filter Cartridge(s)

Optional Pressure Limiting Valve(Necessary when inlet pressure exceeds 700 kPa)

The Deluxe - WFTD

Sediments such as fine dirt, hair, rust and slime is removed by a 5 Micron, washable Polyester cartridge that requires less cleaning and lasts twice as long as normal paper media.

Chemical Contamination is reduced by the finest, 5 Micron, washable Polyester cartridge, which will remove almost or entirely all of:

- Bacteria, algae and fungi
- Cysts such as Giardia and Cryptosporidium
- Chlorine
- Volatile organic compounds (VOC's) such as herbicides, insecticides, pesticides, etc
- Heavy Metals including Lead

The Twin Economy - WFTE

Designed for high protection against **sediment infiltration** and moderate defence for **Chemical contamination**.

Sediment such as fine dirt, hair, rust and slime is removed by a 5 micron Activated Carbon Block Filter that requires less cleaning and may last twice as long as paper media.

The 5 micron Activated Carbon Block Filter will provide high absorption of

- Chlorine
- Organic (VOC) absorption
- And will give extended Life

The Single Superior - WFSS / Superior BenchTop - WFSBT

In certain locations piped water supply may not need separate protection against sediment contamination. Here we suggest the GD Single Superior. The extruded 5 micron Activated Carbon Block, one micron, filter provides very high removal of:

- Chlorine
- Volatile organic compounds (VOC's) such as herbicides, insecticides, pesticides, etc

It performs very well as a sediment filter - removing a very high proportion of all dirt that may be present in the water supply.

Portable Filter – WFPBT (11,13 & 16 litres)

Gravity Water Filtration is a natural, traditional, simple but efficient and effective method of Purification. Water is poured into an upper chamber which slowly passes down through a micro-porous activated carbon ceramic filter, into the lower section, which is now full of pure and clean drinking water.

The **Portable Filters** are:

- Economical to use and maintain - Filter candles are easy to remove, clean and change.
- Requires no Plumbing and can be easily moved at anytime.
- Ideal for functions and parties.
- Made of Seamless, Polished Stainless Steel - simple to clean and Dishwasher proof.

The **Portable Filter** will remove:

- Dirt, Hair, Rust, and Slime
- Bacteria and Algae
- Cysts such as Giardia and Cryptosporidium
- Chlorine
